

COURSE APPROVAL ROUTING CHECK LIST

1. **Course Number:** ACM
PSM 631

1st Bulletin 11-5-09
2nd Bulletin 11-19-09

091024

2. **Course Title:** Eigenvalue Problems
(no more than 70 characters)

Title Abbreviation: Eigenvalue Probs
For use in Master Schedule (no more than 19 characters)

3. **Action:** New Course Revision IF Designation WAC

Requested Designation(s): _____

Course Proposal/Revision Check List

This checklist will help departments avoid some of the most common mistakes made on course proposals. Your use of the checklist will allow the College Senate Curriculum Committee to focus its review on more substantive issues and expedite the approval process.

- Proposal format conforms to the Directory of Policy Statements, Section IV:02.00 (2002).
- Proposal has been proofread for spelling, punctuation, grammar, style and gender-neutral language.
- If the course is a new course, reasons for the additions are included; if the course is a revision of an existing course, reasons for revision and a copy of the old course are included as well as the IF Narrative when appropriate.
- Catalog description follows the guidelines in the Curriculum Handbook, Appendix C.
- Student learning outcomes are coherent with course content and assessment.
- Outcomes are referenced with course content.
- All resource entries are alphabetized and conform to a specific style manual.
- Cross listed courses have been checked with all chairs and deans included in development of the course.

DEPARTMENT ACTION

Wesley Selley _____ 10/16/09
Chair, Department Curriculum Committee Date

4. **Approved** with confirmation that all necessary laboratories, studios, resources, facilities and personnel for support of this course are available.

David C. With _____ MATH 10/16/09
Signature of Department Chairperson Department Date

(OVER)

Faculty (Check one) SNSS School of Natural and Social Sciences
 SOE School of Education
 SAH School of Arts and Humanities
 SOP School of Professions

DEAN'S ACTION

Approved with confirmation that all necessary laboratories, studios, resources, facilities and qualified faculty for support of this course are available.

10/31/09 _____
Date Signature of Dean (both Dean's if cross-listing)

COURSE PACKET INCLUDES:

- Electronic proposal form
- Attached electronic document with explanations of contingencies as stipulated at Dean's level
- One hard copy of proposal with attached contingencies and routing sheet with all appropriate signatures (copy of routing sheet in packet sent to Academic Affairs)
- For all revisions, one hard copy of current course should be submitted (e-copy is preferable when available)

COLLEGE SENATE ACTION

1. **Received**, logged and electronic packet and hard copies forwarded to the College Senate Office. Program title to be published in the *College Bulletin*.

10/27/09 _____ 091024
Date Signature of College Senate Office Log Number

2. Action for Intellectual Foundations' Designation

_____ Recommend approval _____
Signature of Assistant Dean, Intellectual Foundations

_____ Recommend disapproval _____
Signature of Assistant Dean, Intellectual Foundations

3. **Action** of the College Senate Curriculum Committee

Recommend approval and forward to College Senate
11/17/2009 _____
Date Signature of Chair, College Senate Curriculum Committee

_____ Recommend disapproval and return to Department

Date Signature of Chair, College Senate Curriculum Committee

ACTION OF THE OFFICE OF ACADEMIC AFFAIRS

Approved and forwarded to President _____
Signature Date

_____ Disapproved and returned to Department _____
Signature Date

Prefix, Number and Name of Course: PSM 631 Eigenvalue Problems

Credit Hours: 1

In Class Instructional Hours: 1 **Labs:** 0 **Studio:** 0 **Field Work:** 0

Catalog Description:

Prerequisite: Admission to program or instructor permission

Numerical algorithms for eigenvalue problems, matrix factorization, matrices, vectors, eigenvalues, eigenvectors, eigenspaces, eigenvalue algorithms, selected problems from applied settings.

Reasons for Addition or Revision:

To create a one-semester-hour core module for the graduate Professional Applied and Computational Mathematics program where students will study numerical methods and algorithms for eigenvalue problems arising from quantum mechanics, finance, molecular physics, quantum chemistry, geology and glaciology, image and signal processing, and many other areas.

Student Learning Outcomes: Students will	Course Content References:	Assessment:
1. analyze and compare techniques to form orthonormal bases.	I	Group work in class, individual homework assignments, exams.
2. formulate and interpret the solutions of eigenvalue problems that arise from real world problems.	I-III	Group work in class, individual homework assignments, exams, and computer projects.
3. apply numerical linear algebraic methods for solving eigenvalue problems that arise from real world problems.	II-IV	Group work in class, individual homework assignments, and computer projects.
4. modify and test computer software for diverse practical settings.	I-IV	Group computer projects.
Course Content: I. Inner product spaces A. Inner products B. Angle and orthogonality C. Orthonormal bases D. Orthogonal matrices		

II. Eigenvalues problem

- A. Eigenvalues and eigenvectors
- B. Diagonalization
- C. Orthogonal diagonalization

III. Eigenvalue algorithms

- A. Power iteration
- B. Inverse iteration
- C. QR algorithm
- D. Divide-and-conquer algorithm

IV. Selected problems

- A. Chaos
- B. Molecular orbitals
- C. Geology and glaciology
- D. Stress tensor
- E. Genetics
